# Autobooks Invoicing

Invoicing with Autobooks is simple, fast, and efficient!

Autobooks Invoicing provides robust tools to manage the invoicing process. Business owners track invoices and payments made, can upload an unlimited number of customer and product records and can customize their invoicing template.

Business owners send invoices to their customers via email. The customers click on a link within their email to view and pay their invoice through a secure web page.

Customers who receive an invoice can pay it immediately upon receiving it electronically using all major credit / debit cards (including American Express) or ACH Transfer.

The funds will go directly into the your customer's checking account and are usually deposited within just a couple business days of the payment submission!

When sending invoices through Autobooks, business owners can even choose to enable automatic reminder messages for payment, automatic past due reminders and even automatic late fees.

All invoices are kept organized within the module and are color-coded to make reading and understanding the status of the invoice simple and intuitive.

Managing recurring invoices is a breeze! Recurring invoices are kept in an organized list for easy viewing and modification.

Businesses can take advantage of the Estimates tool to provide cost ideas before sending out an official invoice.

These estimates are managed in their own tab and business owners can turn them directly into an invoice with a simple click.
